GST is proud to offer School District-LT@ (Light) Services for Riverside County School Districts. Find out why other school districts are jumping on board...

School District-LT@ automatically loads your Student Database with accurate Geographic Data (including School Districts, Attendance Areas, and Study Area\* boundaries). On-going accurate data ensures your students are properly validated before they get into your Student System wrong. **It saves you time and money!**

School District-LT@ also includes the easy-to-use GST Online Addmatch@ for countywide School District/Attendance Area validation. It can be used at District or School Sites, and tells you which District/School a student attends.

### **School District-LT@ offers:**

- Data Scrub your existing Students & Fix addressing Errors
- Unattended Daily GIS updates into your Student Database
- Loads into your Zangle@ Student System (or other similar Student Database)
- Uses GST GeoSense@ Geographic data, one of the most accurate GIS Datasets available for your county
- A Fraction of the cost of Full GIS Services
