

## GST Web-based Address Locating System Web Data & Maps for Schools, Business, and More...

**A New & Fresh Approach to Addmatching!** GST Web Solutions offer No Hassle, Cost Effective Web-based Addmatching to locate Schools, Businesses, and/or Other Customized Information you may want to access directly from the Web.

**User-Friendly Web Interface:** GST Web-based applications are designed with ease-of-use in mind. They're powerful and comprehensive in functionality, but designed to be simple to use.

**Uses Reliable Web Data:** Your addressing results are only as good as the GIS Data you use. GST WebAddmatch uses GST GeoSense® geographic data, widely recognized as one of the most accurate and aggressively maintained GIS Address Databases available, along with other reliable Data sources. GST specializes in Data for Riverside County, but also maintains a nation-wide GIS Database if you're interested in aggregating data from multiple states and counties.

**Web Locator Maps:** GST WebAddmatch has a built-in web map interface that offers accurate, high quality, interactive Web Maps.

**Customized Versions:** GST Web Solutions can create customized version of WebAddmatch just for you! If you need additional boundary layers, site data, or demographic/statistical data in WebAddmatch, we can do it for you!

**Check us Out:** Visit our website at [www.hollister-powell.com](http://www.hollister-powell.com) and view samples of our products and mapping products.

### **GST WebAddmatch Online® Version 2.2.0 offer the following:**

- Easy to use web-accessible interface. Nothing to install, maintain, or have your IT Dept. configure for you.
- Customize your display. Pick the fields you want to retrieve and view.
- Locate multiple occurrences of the same address (i.e. 100 Main Street)
- Links search address to other data, such as local schools or businesses.
- Data Retrieval Interface—Specify search categories (i.e. School/Business Type) and distance capture range (i.e. 2/mi., 10/mi., etc.)
- Retrieval tables allow you to sort Web Reports by columns (i.e. Closest Distance, Name, Address, etc.)
- Click-on-Name for Detail and Contact Info.
- Interactive Web Locator Online Maps
- Comprehensive Business Search Interface for Detailed School/Business Data Web Reports
- Uses reliable, daily updated GIS Address Data, and Schools & Business Data
